

SEPARATING PEOPLE FROM HAZARDS

Kee Walk with Guardrail

- OSHA COMPLIANT ROOFTOP WALKWAY WITH INTEGRATED SAFETY RAILING
- FALL PROTECTION SYSTEM SUITABLE FOR ALL ROOF TYPES
- ACCOMODATES ROOF SLOPES UP TO 35°
- PROVIDES SAFE ROOFTOP ACCESS IN ALL WEATHER CONDITIONS

Keep Walk with Guardrail

Safety at the Highest Level

Modular Multi-Tasker

2 Safety Solutions in 1 Integrated System.

Keep Walk with integrated guardrail is a modular, OSHA compliant approach to fall protection. It provides a secure pathway on the rooftop with the added security of a single or dual-sided handrail system.

Here's the Pitch

Up to 35° Roof Slope.

Keep Walk with Guardrail is engineered for all roof types including pitched metal profile and standing seam roofs up to a 35° slope.

Stands Up to the Elements

Dependable when the Weather Isn't.

Accessing sloped roofs presents a challenge especially in wet, windy or snowy conditions. Keep Walk with Guardrail is the fall protection solution wherever sloped rooftops meet inclement weather. Anti-slip treads and corrosion-resistant guardrail provide a durable, safe access solution in any environment.

Stays the Course

Walk It. Climb It. Traverse It.

When accessing the roof on a slope, climbing up or traversing an uneven surface, Keep Walk with Guardrail provides a level pathway over a dedicated course. This preserves the rooftop from damage by uniformly distributing the pedestrian load over its route.

Walk this Way

Single or Dual-Sided Handrail

Our corrosion-resistant guardrail can be installed on one or both sides of the Keep Walk platforms. The option to integrate a single or dual handrail system provides a robust and versatile safe access solution.

Kee Walk with Guardrail Features

- Engineered for use on all roofing systems
- Accommodates sloped roofs up to 35° pitch
- Load-tested for compliance to OSHA Code 1910.29(b)(3)
- Slip-resistant treads available in standard Nylon or Aluminum grating
- Customizable design is adjustable to fit any rooftop

Kee Walk with Guardrail Features Benefits

- Non-penetrating solution - roof membrane will not leak
- Collective system: protects all personnel; no training required
- Cost-effective: combining a defined pathway with KeeGuard handrail
- Integrates easily with our fall protection products including KeeLine Horizontal Lifelines and Step-Over Platforms to form a complete rooftop fall protection solution

Installing Kee Walk with Guardrail

- Walkway modules supplied as 5 foot and 10 foot pre-assembled sections
- Guardrail can be installed on one or both sides of Kee Walk
- Modular galvanized steel guardrail for easy and fast on-site installation
- Available as a retrofit onto your existing Kee Walk system or installed as a new fall protection solution on your rooftop
- Professional installation services available

Compliance

Hierarchy of Fall Protection

- ★★★★★ 1. Eliminate the Hazards
- ★★★★★ 2. Collective Fall Protection [OSHA: Passive]
- ★★★ 3. Work Restraint [OSHA: Active]
- ★ 4. Personal Fall Arrest System

OSHA Compliance

OSHA Code 1910.28(b)(13)

Unprotected Edges: Work on Low Slope Roofs

- Kee Walk with Guardrail meets OSHA compliance for guardrail systems: Capable of withstanding, without failure, a force of at least 200 pounds (890 N) applied in a downward or outward direction within 2 inches (5 cm) of the top edge, at any point along the top rail
- OSHA regulations cite that on any building where work is performed within 15' of an open roof edge, each worker must be protected from the hazard of falling
- Kee Walk with Guardrail provides a safe pathway that requires no formal training or experience [it is passive] and "collectively" protects people when working at height

Compatible with all Kee Safety Fall Protection Products for a Complete Safe Access Solution

STANDING SEAM | METAL PROFILE | MEMBRANE | COMPOSITE | GREEN ROOF

Rooftop Platforms

Working at Heights
Level, anti-slip platforms with safe, dedicated access when performing tasks on the roof.

Rooftop Cross-Over

Step Up and Over Obstacles
Provide a safe route up and over rooftop obstructions or changes in roof levels.

KeeLine

Horizontal Lifeline System
Freedom of movement on the rooftop while securely attached to the lifeline at all times.

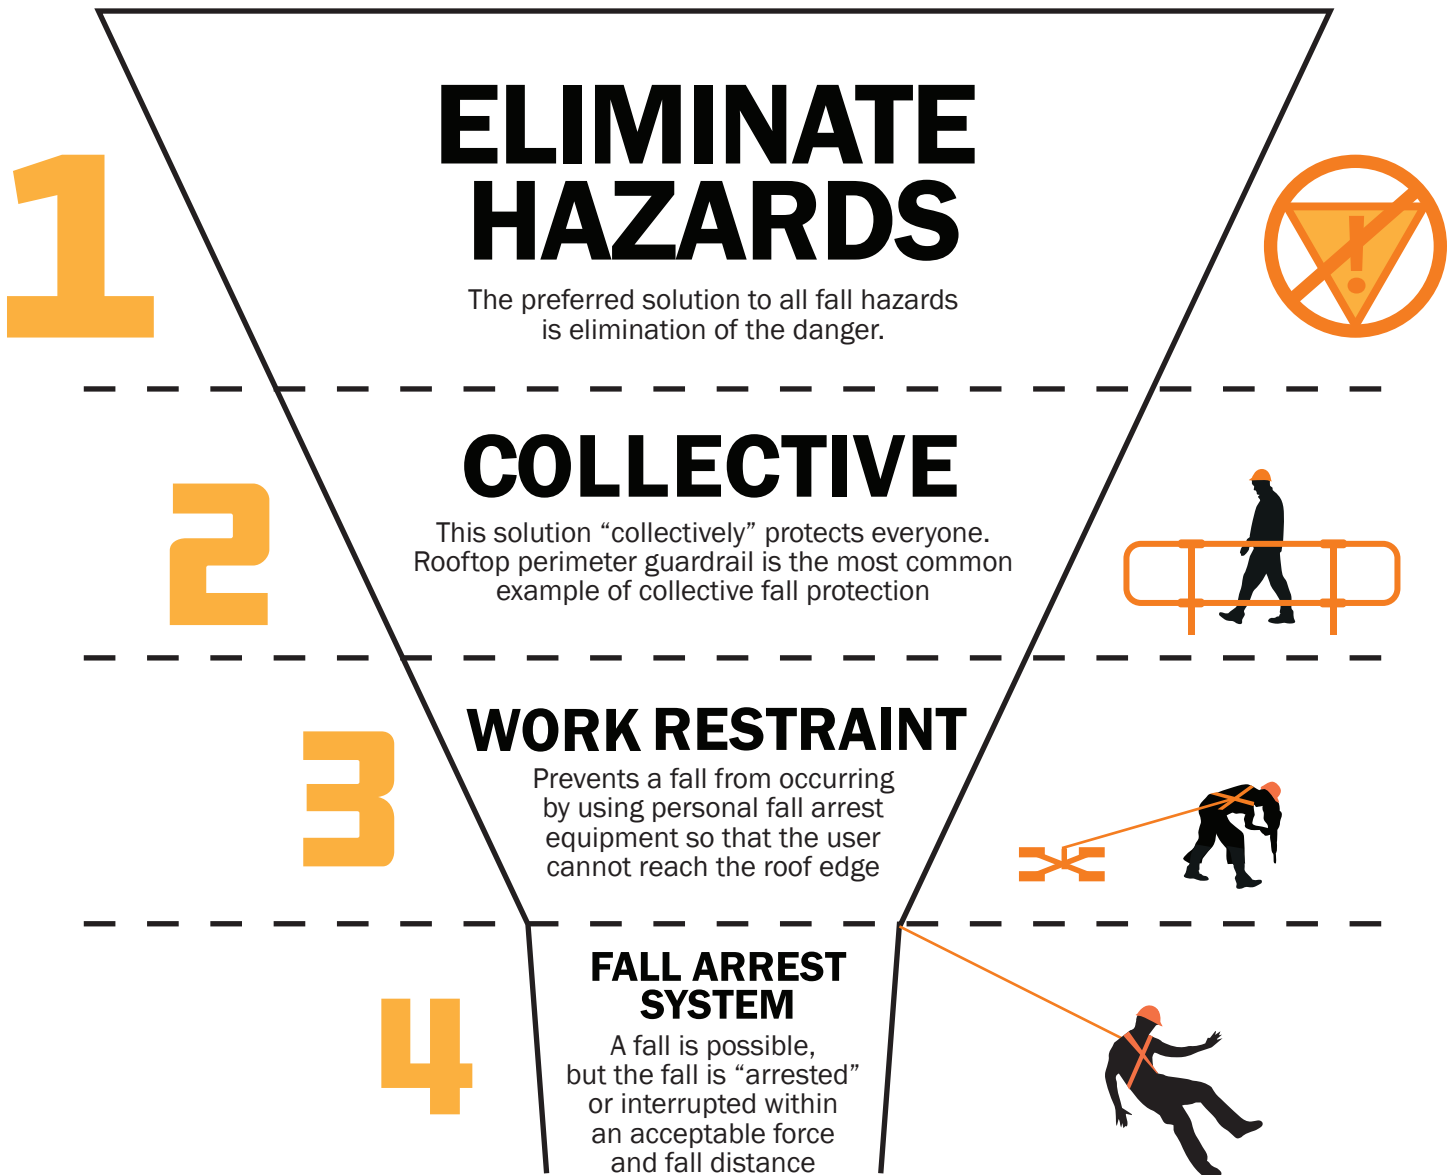

Mini Step-Over

Modular Mini Step-Over Kits
Provides easy navigation over conduit, pipe work and other low roof obstacles with weighted bases for stability.

The Hierarchy of Fall Protection:

Fall protection is a system designed to protect personnel from the risk of falls when working at elevated heights
